Work-a-Day Lunches

The afternoon is the longer half of the working day. To eat a heavy meal at noon, without being able to nap an hour, is the mistake that too many women make. Men don't count. Nature fitted them with strong systems and a quick digestive apparatus. If foods like pastry, meats, fresh bread and pickles, that take from three to five and a half hours to digest, are eaten, the stomach levies on the vital forces, and the brain and muscles get sleepy and stupid. With a piece well-done toast and half a pint of cocoa, chocolate or hot milk a woman can keep up her strength and keep her wits sharpened till dinner time. Another excellent lunch is a bowl of bread and milk. Toasted bread is half digested; so

The habit of taking afternon tea in the Russian fashion, with a slice of lemon instead of milk, is growing in favor among women. There is no doubt that the beverage is less bilious this way and that the delicate flavor of the fragrant leaf can be more easily appreciated. Tea-tasters, when engaged in sampling, never put milk or cream into their cups, which would only serve to make discrimination between the various blends the more difficult.

A Floral Mystery.

The Chinese, Japanese and Siamese are peculiarly skilful at botanical feats. One of their wonderful achievements is known as the "changeable rose." This is a pure, waxy white blossom. When white to the most sanguine of sanguine hues depending on the degrees of sunlight and warmth. First the petals take on a kind of washed or faded blue color, pink. The pink gradually deepens in hue until you find that your lily-white rose of an hour before is as red as the red-
